6. How is nanotech different from biotech?
7. How is Spray For Life® related to Nanotechnology?
8. What is this patented NanoSized™ process?
9. Why is “Nano” safe?
10. What makes Spray For Life® better than other dietary supplements?
11. What makes Spray For Life taste so incredibly good?
12. When are the best times to take Spray For Life®?
13. What is in Spray For Life®?
14. Are all Spray For Life® products made in the USA?
15. Does Spray For Life® contain any sugar?
16. Are Spray For Life® products safe for diabetics?
17. What alternative natural sweeteners are used in Spray For Life®?
18. How much does each Spray For Life® container hold?
19. Why do I take Spray For Life® more than once a day?
20. What is not in Spray For Life®?
21. Will Spray For Life interact with my prescription medication?
22. Are the flavors used in Spray For Life® all natural?
23. My spray bottle has accumulated residue, what should I do?
24. Are the ingredients in Spray For Life® products approved by the FDA?
25. Can I take Spray For Life® on a plane?
26. Check with your doctor before taking Spray For Life® if...
27. Is it safe to combine several Spray For Life® products together?
28. How long does one bottle of Spray For Life® last?
29. What is the Spray For Life® bottle made of and is it safe?
30. Is Spray For Life® affected by extreme temperatures?
31. Is it harmful to take outdated/expired Spray For Life®?
32. Is Spray For Life® Gluten-free and safe for individuals with sensitivities?
33. Are all Spray For Life® products TSA compliant?
34. Do larger individuals need to take more than the standard dose?

Ingredients used in Spray For Life® and Why?

1. In the Nano B-12, why Cyanocobalamin rather than Methylcobalamin?
2. In the Nano COQ10, why Ubiquinone rather than Ubiquinol?
3. What is Citric Acid?
4. What is Potassium Sorbate?
5. What is Vegetable Glycerine?
6. What is Jujube Extract?
7. What is Adenosine?
8. What is an Amino Acid Complex?
9. What is Garcinia Cambogia and why is it in the Sweet & Slim?
10. Do We Really Need Vitamin Supplements?
11. Should We Take Vitamins Daily And How Nutritionally Deficient Are We?
12. What are Vitamins?

Order and Payment

1. How do I place an order?
2. A product I wish to buy is out of stock. Can I still order it?
3. How can I find out the status of my order?
4. Can customers outside the U.S. order from the website?
5. Can I make changes to my order after I have submitted it?
6. Can I cancel my order once it has been submitted?
7. I order the same products. Can I be set up to receive them automatically?
8. Will you notify me if there are problems with my order?
9. What forms of payment do you accept?
10. Do I need to pay sales tax with my order?
11. If one or more of my items are on backorder, when will I receive my order?

Shipping

1. When will my order ship?
2. What shipping carrier do you use?
3. What are my shipping options? How much does each cost?
4. Do you refrigerate products during shipping?
5. How can I determine the exact shipping cost for international orders?
6. Will you notify me when my order has been shipped?
7. Can I ship to an address other than my own?

Return Policy

1. What is your Easy Return Policy?
2. How do I return an item?
3. What should I do if my items arrive damaged or defective?
4. What should I do if I received the wrong item?

Privacy Policy and Terms & Conditions

1. What information does Spray For Life® collect?
2. How does Spray For Life® use or disclose the information it collects?
3. How can I correct, update, or delete my information?
4. What happens to my information if Spray For Life® is sold to or merges with another company?

[Product Questions](#) | [Customer Service](#) | [Privacy Policy](#) | [Product Guarantee](#) | [General Info](#)

Spray For Life® and its Patented Technology

Q1: What is Spray For Life®?

A: Spray For Life® is the most technologically advanced dietary supplements globally available on the market today.

Q2: Why do I need to take Spray For Life®?

A: Vitamins help release energy from our food and help build muscle, bone, blood and other vital tissue. With a regular supply of nutrients, we can maintain good health and normal growth. Since the body does not store all essential vitamins for long periods of time, some can be supplemented on a regular basis. Spray For Life® multi-vitamin can be taken to help support complete nutrition.

Q3: Which Spray For Life® products are available?

Sprayforlife.com

© 2019 NanoSynergy Worldwide. All Rights Reserved.

Contact NanoSynergy Worldwide at Phone: Toll Free: (877) NSW-NANO (679-6266)
NanoSynergy®, NanoMist®, and Spray For Life® are registered trademarks.

A: Following Nano products are available:

- [Nano B-12 Booster](#)
- [Nano Super B-Complex](#)
- [Nano COQ10](#)
- [Nano Sweet & Slim](#)
- [Nano Melatonin](#)
- [Nano Multi-Vitamin](#)
- [Nano Vitamin D-3](#)

Q4: What makes Spray For Life® so unique and is it patented?

A: Spray For Life® is so unique it was the first patented nutraceutical nanotechnology process patent ([6,861,066](#)) filed in the United States Patent and Trademark Office in Washington, D.C. Its NanoMist® delivery system presents nutraceuticals that are much more bioavailable and efficacious than any other dietary supplements.

Q5: What is Nanotechnology?

A: Nanotechnology is science, engineering, and technology conducted at the nanoscale, which is about 1 to 100 nanometers. Nanoscience and nanotechnology are the study and application of extremely small things and can be used across all the other science fields, such as chemistry, biology, physics, materials science, and engineering.

Q6: How is nanotech different from biotech?

A: Based on the definition of nanotech given above, biotech can be thought of as a subset of nanotech - "nature's nanotechnology." Biotech uses the molecular structures, devices, and systems found in plants and animals to create new molecular products. Nanotech is more general, not being limited to existing natural structures, devices, and systems, and instead designing and building new, non-biological ones. These can be quite different: harder, stronger, tougher, and able to survive a dry or hot environment, unlike biology. For example, nanotech products can be used to build an automobile or spacecraft.

Q7: How is Spray For Life® related to Nanotechnology?

A: Everything in nature is at the nanoscale or atomic levels, and Spray For Life® is no exception. Spray For Life® utilizes a patented NanoSyzed™ process that allows the ingredients to be processed and stabilized resulting in an end-product as nature intended. This allows these nutrients to be made available to be dispensed through an intraoral spray which increases absorption and bioavailability.

Q8: What is this patented NanoSyzed™ process?

A: This NanoSyzed™ patented (6,861,066) process is a cold process. It allows a formulation to pass through fixed-geometry micro channels within its unique interaction chamber. As a result, the product stream accelerates to high velocities (faster than the speed of sound *to 1500 ft/sec for 3-5 nanoseconds*); creating shear rates within the product stream that are orders of magnitude greater than any other conventional means. Our products experience identical processing conditions, producing the desired results, including: uniform particle and NanoSyze™ reduction. This is achieved without excessive heat or breaking any chemical bonds (i.e. mimic shear from chewing).

Q9: Why is "Nano" safe?

A: Spray For Life® uses NanoSyzed™ product formulations consisting of a highly concentrated intraoral spray dispensing system called NanoMist®. This intraoral spray allows for absorption through the circulatory system, which reduces first pass liver metabolism.

Spray For Life® researchers have tested and screened over a thousand raw ingredients while observing very large differences in particle size and solubility. We then have developed a proprietary testing methodology to identify raw ingredients that have the smallest particle size combined with natural methods to balance the hydrophobicity (HLB/LogP) and ionic state (pKa, zeta potential) in a water based delivery vehicle.

We have identified numerous food approved, Generally Recognized as Safe (GRAS), and natural ingredients to restore the solubility and bioavailability of most dietary supplements. Our NanoSynergy® technology delivers completely natural, NOT synthetic, molecules to your system in a form that most closely mimics the hydrated structure found in nature. This NanoSized™ process then keeps these ingredients in a stable form while remaining in solution, and without reaggregation or precipitation.

Q10: What makes Spray For Life® better than other dietary supplements in pill, tablet gel-capsule or liquid form?

A: Spray For Life® can be taken at any time at any place without the need for water or food. Spray For Life® addresses the difficulty 4 out of every 10 consumers ([40% of the Adult U.S. population](#)) experience while swallowing pills, tablets and gencaps as well as inefficient assimilation and absorption. And with Spray For Life® you will not experience any stomach upset.

Q11: We have taken liquid vitamins and sprays before, but how do you make Spray For Life® taste so incredibly good?

A: What you are experiencing with the flavor of Spray For Life® is over 20 years of flavoring expertise combined with a team of other specialists that have over 50 years. All the flavors used in Spray For Life® are natural and contain no fruit juice.

Q12: When are the best times to take Spray For Life®?

A: The simple answer is "any time." Our products are so convenient there is no need for water, and small enough to be carried with you or one at the office for super convenience. Since the products are in a nano-liquid state, digestion has little or no affect in there absorption capabilities. There is no need to eat food before consuming any of your Spray For Life® products, like you would with other dietary supplements.

Here are a few ideas:

Morning: Let Spray For Life® fuel your body first thing allowing the nutrients needed for a demanding day. Several sprays will keep you going strong and keep you alert.

After Lunch: Research shows that over 70 percent of us hit the wall after lunch. Let Spray For Life® help you get over that wall and have an alert, productive afternoon.

Workouts: Looking for motivation to workout? Make Spray For Life® part of your healthy lifestyle.

Sports: Be the leader on the field, court, track or course and stay there stronger and longer with Spray For Life®.

Travel: Anyone who travels frequently knows how tiring it can be especially when it comes to jet lag. Have the B-12 Booster fuel your body and have the Melatonin assist your body to rest as it may help to adjust for time differential.

Weekends/Vacations: Action-packed weekends and vacations require a lot of energy. Whether you're doing the lawn or garden work, going on a hike or playing on the beach, Spray For Life® can give you the extra edge you need no matter what the demand.

Q13: What is in Spray For Life®?

A: Spray For Life® contains natural ingredients that assist your body to perform at its optimum level.

Q14: Are all Spray For Life® products made in the USA?

A: YES! Spray For Life® products have been patented, manufactured and tested in the US since 1997. We offer products that are unsurpassed in quality and efficacy and are backed by clinical science. Our customers include a broad scope of international consumers and distributors, medical and healthcare practitioners, professionals, pharmacies, and the internet. What distinguishes Spray For Life® from the other supplement companies is the fact that our branded supplements are produced and manufactured in the USA using in most cases, only USA manufactured ingredients. All manufacturing is performed under highly regulated procedures according to good manufacturing practices (GMP). Rest assured, Spray For Life® delivers only pure, quality-controlled nutritional supplements.

Q15: Does Spray For Life® contain any sugar?

A: Absolutely not! Only alternative natural sweeteners (diabetic friendly) are used in Spray For Life®.

Q16: Are Spray For Life® products safe for diabetics?

A: All our spray products contain small amounts of sweeteners and these sweeteners are used by diabetics as an alternative to sugar. They are either low glycemic or have 0 glycemic index. However, diabetes is a disease which affects sufferers in different ways, so a diabetic user should monitor blood sugar levels just to make sure that there are no adverse reactions. Many of our customers are diabetics and have experienced no problems when using Spray For Life®.

Q17: What alternative natural sweeteners are used in Spray For Life®?

A: The best natural sweeteners go into our products.

1) **Stevia** is a noncaloric 0 glycemic index sweetener. This sugar substitute derived from the leaves of the stevia plant that is significantly sweeter than sugar is ideal for low-carb diets and those watching their sugar intake. Most often considered an herb or dietary supplement, its approval for use as an additive by the FDA was in 2008.

- 300 times sweeter than sugar
- Helps to keep the body's blood sugar in balance
- Low caloric, aids weight management
- Beneficial for hypoglycemics
- Increases energy levels and mental activity
- Assists in Lowering hypertension
- Appears to increase levels of HDL, or 'good' cholesterol

Not all stevia products are equal. For more information on which Stevia Spray For Life® utilizes, please refer to the following link [Steviasuavé™](#)

2) **Xylitol is a 100% natural product**, a sweetener that occurs naturally. It can be found in berries, fruit, vegetables, mushrooms and hardwood trees. It also occurs naturally in our bodies – in fact, an average size adult manufactures up to 15 grams of xylitol daily during normal metabolism.

Xylitol is a naturally occurring carbohydrate, that looks and tastes just like regular table sugar. It is a natural sweetener that can be extracted from any woody fibrous plant material.

- **Safe For Diabetics** -Unlike sugar, xylitol is not easily converted to fat.

NanoSynergy®, NanoMist®, and Spray For Life® are registered trademarks.

- **Helps Prevent Cavities**-Since it is a non-fermentable sugar, it cannot be converted to acid by oral bacteria. Thus, the alkaline-acid balance in the mouth is maintained, which [helps in preventing cavities](#).
- **Helps Prevent Ear Infections**-Xylitol can also be used as medicine in prohibiting certain bacterial growth to help [prevent ear infections](#) in young children. It will also help clear out earwax and prevent the growth of harmful bacteria in the pharyngotympanic tubes, connecting the nose and ear.
- **Slows the Growth of Candida**-Xylitol helps prevent bad breath, ulcers, and stomach cancer by [slowing down the growth](#) of Candida Albicans (a serious [yeast infection](#)), and other harmful bacteria like H. pylori.
- **May Improve Bone Density**-According to [research](#) from the University of Oulu in Finland, xylitol was shown to help improve bone density in rats. This indicates it has potential as a treatment for osteoporosis in humans.

For more information on which Xylitol Spray For Life® utilizes, please refer to the following link [Global Sweet](#) and not all Xylitol products are equal [xylitol-brand-comparison](#).

Another link for information: [xylitol.org](#)

3) Vegetable Glycerine is 100% pure, safe and low glycemic index sweetener. It contains no carbohydrates or cholesterol. Derived from coconut or **palm oil**, this product is excellent for use in raw foods as well as in baked and cooked foods.

Glycerine is not chemically related to sugar and seems to have no affect on insulin and blood sugar levels making it a safe alternative for diabetics and people with candida yeast overgrowth. It also does not feed the bacteria that form plaques and cause dental cavities.

A little goes a long way - only one tablespoon of vegetable glycerine is equivalent to about 1/4 cup of sugar. Vegetable Glycerine is pure Kosher grade and is suitable for vegans and vegetarian.

4) Oh! So Sweet Reb-A/Citrus Extract Blend 150 is a natural sweetener and flavor enhancer approximately 150 times sweeter than sugar which is Kosher Certified. It contributes zero calories & zero carbohydrates to finished products. It is derived from Stevia (Reb-A) and Citrus Aurantium (bitter orange peel), liquid in form. The citrus extract has been blended with Reb-A (97%) to increase the sweetness intensity and improve the flavor of our *Spray For Life*® product. OH! So Sweet meets all regulatory requirements in the U.S.A, European Union and Canada.

Q18: How much does each Spray For Life® container hold?

A: Each container holds .88 fl oz. (26 ml), which is a 30 day (1 month) supply when used as directed, which is 3 sprays twice per day or 180 metered sprays. The only exceptions occur when taking Melatonin, 6 sprays prior to sleep and Sweet & Slim™ (weight management), 2 sprays three times daily.

Q19: Why do I take Spray For Life® more than once a day?

A: Just as you eat several times a day, we recommend that you take your Spray For Life® products at least twice a day so that your body is well fueled and able to tackle the stressful situations that most of us experience throughout the day.

Q20: What is not in Spray For Life®?

A: All Spray For Life® products **do not** contain GMO's (Generally Modified Organisms), *sugar, fruit juice, salt, yeast, wheat, gluten, corn, milk, egg, soy protein, MSG, shellfish, preservatives or artificial flavors*

[Sprayforlife.com](#)

and colors. It also **does not** contain fillers, binders, wax, shellac, talcum, animal gelatin or any other excipients.

Q21: Will Spray For Life® interact with my prescription medication?

A: We stress that any person taking medication under the care of a physician should discuss the use of all other products with the physician. The physician needs to have full disclosure to all products you are taking in order to fully evaluate your treatment.

One should also remember that the nutrients used in our products are identical to those found naturally in food.

Q22: Are the flavors used in Spray For Life® all natural?

A: Yes! All flavors are natural and are sourced from the best flavoring houses in the world (USA). Please find the following links to two of our flavor houses for more information.

[E.A. Weber and Company – Architects of Flavor since 1902](#)
[Prinova™ - "Your Secret Ingredient" since 1978](#)

Q23: My spray bottle has accumulated residue around the spray mechanism, what should I do?

A: The fine mist on the sprayer is intended to disperse the formulation throughout the mouth for better absorption capabilities and may have a tendency to leave somewhat of a residue over time. We recommend that you periodically rinse your sprayer under lukewarm water to remove any residual buildup.

Q24: Are the ingredients in Spray For Life® products approved by the FDA?

A: The FDA acknowledges the safety of nutritional supplements that fall under the [Dietary Supplement Health & Education Act](#) (DSHEA). Spray For Life® ingredients are all covered under DSHEA*.

Q25: Can I take Spray For Life® on a plane?

A: All Spray For Life® products are TSA compliant in the 25ml Go Anywhere Spray Travel Bottle as a carry-on when traveling via air.

Q26: Check with your doctor before taking Spray For Life® if...

- A:**
- You are currently taking any prescription medicines.
 - You have been advised by your physician to avoid certain vitamins and minerals.
 - You have a medical condition that makes you concerned about taking it.
 - You are concerned about taking it for any reason.

Other concerns?

- A:**
- Diabetics: Spray For Life® is **sugar free**. However, check with your doctor before taking Spray For Life® if you have concerns about how it may affect you.
 - There are no animal products added to Spray For Life®.

Q27: Is it safe to combine several Spray For Life® products together?

A: YES. Our in-house formulators take into consideration the very active modern lifestyle when developing Spray For Life® products and have designed them to work in conjunction with each other. Spraying different products at the same time will not decrease their effectiveness or harm you.

Q28: How long will one bottle of Spray For Life® last?

A: On average most sprays last for one month as directed. Some formulas such as Sweet & Slim is recommended by taking 2 sprays 3 times a day, and if you are experiencing hunger or would like a snack, so it may last less than one month.

Q29: What is the Spray For Life® bottle made of and is it safe?

A: Polyethylene Terephthalate (PET) is globally recognized as the greenest and a safest, recyclable packaging material on the planet. Most single-serve plastic bottles, including those for water, soft drinks and juices, are made with PET, which can be recycled and does not contain bisphenol-A (BPA). BPA is an industrial chemical that has been used to make certain plastics and resins since the 1960s. Please find the following link for more information regarding the safe uses of PET plastics for food products [The Facts on PET](#).

Q30: Is Spray For Life® affected by extreme temperatures?

A: Spray For Life® should not be exposed to temperatures greater than 49°C (approximately 120°F) for any extended periods of time. Like any food products, high temperature will spoil the ingredients over time. We do not recommend leaving your Spray For Life® products in your automobile during the summer months. Also, we do not recommend refrigerating or freezing your Spray For Life® products, preferably store at room temperature.

Q31: Is it harmful to take outdated/expired Spray For Life®?

A: All our products are assigned an expiration date, which is based upon extensive stability studies. We guarantee the potency of the product until the last day of the month noted on the package. There is no evidence to indicate that the ingredients in the product would be harmful if consumed beyond the expiration date. You may not, however, be receiving the amount of each vitamin or mineral listed on the label. The potency of the ingredients slowly diminishes over an extended period of time, and the expiration date is determined by the least stable ingredient in the product. We recommend that the product not be used after the expiration date.

Q32: Is Spray For Life® gluten-free and safe for individuals with sensitivities?

A: Yes. All Spray For Life® products are gluten-free.

Q33: Are all Spray For Life® products TSA compliant?

A: Yes, the Transportation Security Administration ([TSA](#)) allows 3.4 ounce (100ml) bottle or less ([by volume](#)). All Spray For Life® products meet compliance with 25ml. per vial.

Q34: Do larger individuals need to take more than the standard dose?

A: No. Spray For Life® is not dispensed according to weight or size of individuals.

Ingredients used in Spray For Life® and Why?

Q1: In the Nano B-12, why Cyanocobalamin rather than Methylcobalamin?

A: A short list of benefits of Cyanocobalamin vs Methylcobalamin

1. Stability of the Cyanocobalamin allows for a longer shelf life and ease of use.
2. Cyanocobalamin has a lower production cost than Methylcobalamin and is easier to work with on a manufacturing level.
3. Cyanocobalamin is naturally converted to Methylcobalamin as the body needs it and it is stored up to 6 months in the liver.
4. Cyanocobalamin is naturally available in foods mainly dairy, fish, liver, beets and meat.
5. Methylcobalamin is immediately available as an active form of B-12, but dissipates quickly. It is most appropriate for athletes seeking immediate availability and patients with severe nerve damage or liver disorders (incapable of converting Cyanocobalamin to Methylcobalamin)
6. Methylcobalamin causes what is called a “Methyl crash” due to the speed of utilization. Methylcobalamin is rapidly utilized (not requiring Liver uptake and conversion). However, it is used up quicker creating a “Methyl Crash” when used up, usually in a few minutes.
7. Cyanocobalamin is smoother as it is introduced into the body functions in a gradual continual basis.
8. Cyanocobalamin has the CN ion added to increase the stability of the molecule in the bloodstream and in its product forms. It loses the CN ion when it is converted in the body to an active form. The amount of cyanide liberated in this process is so small that its toxicity is negligible.

For the reasons explained above Cyanocobalamin is most appropriate for the majority of consumers who have the ability to store up Cyanocobalamin in the liver and release it as Methylcobalamin or other B-12 vitamers when needed by the body.

For additional information, please find links to experts who recommend Cyanocobalamin rather than Methylcobalamin.

4. [Which type of vitamin B12 is best—cyanocobalamin, methylcobalamin, or hydroxycobalamin?](#)

Q2: In the Nano COQ10, why Ubiquinone rather than Ubiquinol?

A: Coenzyme Q10 (CoQ10) is critical to your health—especially as you age. This compound is the spark that fuels energy production in every cell in your body, including your heart, which is your body’s biggest energy user.

Ubiquinone is the oxidized form of CoQ10. Once ingested, enzymes “reduce” ubiquinone to ubiquinol, the “active” antioxidant form that makes up practically all of the circulating CoQ10 in the body. Ubiquinol was developed as a commercial supplement a couple of years ago, and one small study suggested that it had excellent absorption properties when compared with the powdered form of CoQ10.

NanoSynergy®, NanoMist®, and Spray For Life® are registered trademarks.

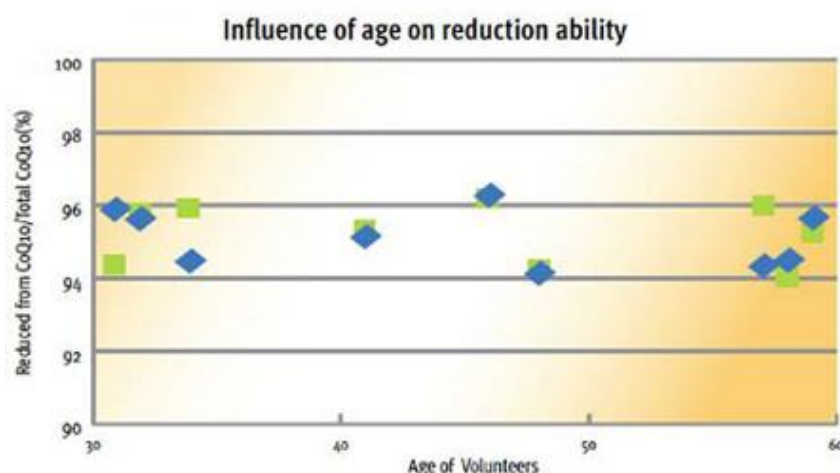

Note: Our Spray For Life Nano COQ10 is in a liquid form and encapsulated in Vitamin E for superior absorption and bioavailability. The product is superior in all aspects to the present forms of COQ10 and the spray makes it more convenient and much more utilized.

The simple truth is that both forms are needed by the body, and CoQ10's location in the body determines the form it takes. Inside the cells, where energy is produced, ubiquinone is in great demand. However, outside the cells, in the blood and cell membranes, ubiquinol works as an antioxidant.

Importantly, ubiquinone and ubiquinol form a redox pair. This means each one can be easily converted to the other by the body.

Given the fact that the body can switch the two substances back and forth to meet its own requirements, the argument that ubiquinol is the "biologically active" form of CoQ10 is not valid. Additionally, while claims have been made that adults over 40 have difficulty reducing ubiquinone to ubiquinol, a recent human study indicates otherwise.

Following the Science

It's ironic that ubiquinone is often viewed as inferior to ubiquinol, considering that the ubiquinol found in animal protein is converted to ubiquinone through the process of cooking before it is eaten.

Similarly, ubiquinol taken as a supplement is quite unstable in the stomach and is converted back to ubiquinone before absorption. This means that no matter which form of CoQ10 the consumer chooses to ingest, it's ubiquinone that is absorbed into the body.

Perhaps more importantly, in the four years since ubiquinol was presented as an alternative to ubiquinone, only one human clinical trial on the substance has been published in the peer-reviewed scientific literature. In marked contrast, there have been hundreds of clinical studies showing ubiquinone is an effective supplement for a wide variety of illnesses and conditions.

For additional information, please find links to experts who recommend Ubiquinone rather than ubiquinol.

Q3: What is Citric Acid?

A: *Citric acid* is a very useful and effective preservative, obtained from naturally occurring organic acids. It exists in many different fruits and vegetables, but is especially concentrated in lemons and limes. Citric acid is used extensively in the food, beverage, cosmetic, and pharmaceutical industries. It has been recognized as safe by all major national and international food regulatory agencies, and is also approved by the US Food and Drug Administration and in Europe for use in food. Citric acid is used for many different reasons, including (but not limited to):

- Antioxidant and preservative properties
- prevents rancidity and bacteria growth
- Astringency and Acidity
- Adjusts pH
- Stabilizes the ingredients, color, taste, and flavor of a product
- Rapidly biodegradable

Furthermore, since citric acid is present in almost every life form, it is consequently easily metabolized and eliminated from the body.

Q4: What is Potassium Sorbate?

A: *Potassium sorbate* is a salt of sorbic acid which is naturally found in some fruits (like the berries of mountain ash). It is a white crystalline powder that has antimicrobial properties. It is one of the safest and most commonly used preservatives today. In foods, potassium sorbate increases shelf life and reduces the risk of food-borne illnesses, without adversely affecting taste, color or flavor.

Safety

Potassium sorbate has been generally recognized as safe for use in foods and personal care products. It has been cleared as a food preservative by the U.S. Food and Drug Administration based on extensive testing. Potassium sorbate is well-tolerated in most people, being easily metabolized. Allergic reactions are rare.

- For additional validation of its safety - [Final Report on the Safety Assessment of Sorbic Acid and Potassium Sorbate](#)

Q5: What is Vegetable Glycerine?

A: **Vegetable Glycerine is 100% pure, safe and low glycemic index sweetener.** It contains no carbohydrates or cholesterol. Derived from coconut or **palm oil**, this product is excellent for use in raw foods as well as in baked and cooked foods.

Glycerine is not chemically related to sugar and seems to have no affect on insulin and blood sugar levels making it a safe alternative for diabetics and people with candida yeast overgrowth. It also does not feed the bacteria that form plaques and cause dental cavities.

A little goes a long way - only one tablespoon of vegetable glycerine is equivalent to about 1/4 cup of sugar. Vegetable Glycerine is pure Kosher grade and is suitable for vegans and vegetarian.

Q6: What is Jujube Extract?

A: What it is: *Jujube* is a fruit with benefits that are well known since ancient times.

Why we use it: *Jujube* fruit is used as herbal medicine for thousands of years in China and other Asian countries.

Q7: What is Adenosine?

A: *Adenosine* is another neuro-transmitter, like Melatonin, which seems to have a significant effect on our sleep. Adenosine is perhaps better known as part of the compound Adenosine Triphosphate, ATP, which is the energy source of the body's cells.

Without the phosphate part, Adenosine is produced during the day and, at night, attaches to receptors in the brain which, in layman's terms, switches off cells in 'arousal centres' and makes you feel drowsy. Overnight, the supply of Adenosine is used up, allowing you to wake up and feel more alert in the morning.

The fact that Adenosine has a link to the cellular energy source, ATP, may indicate that the need to sleep is connected to energy levels in the body.

Q8: What is an Amino Acid Complex?

Amino acids are the basic building blocks of the body. They are also sources of energy, like fats and carbohydrates. However, amino acids are structurally characterised by the fact that they contain nitrogen (N), whereas fats and carbohydrates do not.

Therefore, only amino acids are capable of forming tissues, organs, muscles, skin and hair.

There are three classes of macronutrients in the diet—carbohydrates, lipids and proteins. Amino acids are the building blocks of protein. Humans depend on dietary and supplementary intake of amino acids for our protein needs. A combination of 20 amino acids form the thousands of proteins the human body relies upon every day.

Some amino acids can be manufactured in the body from other amino acids and are thus called non-essential. They are alanine, aspartic acid, arginine, citrulline, glutamic acid, glycine, hydroxyglutamic acid, hydroxyproline, norleucine, proline, and serine.

The amino acids that the body cannot produce and need to be taken in through the diet are called essential. They are histidine, isoleucine, leucine, lysine, methionine, cysteine, phenylalanine, tyrosine, threonine, tryptophan, and valine. Branched chain amino acids have a branch in their structure. They are leucine, isoleucine and valine.

There are three classes of macronutrients in the diet—carbohydrates, lipids and proteins. Amino acids are the building blocks of protein. Humans depend on dietary and supplementary intake of amino acids for our protein needs. A combination of 20 amino acids form the thousands of proteins the human body relies upon every day.

The **importance of amino acids as the precursors of enzymes and neurotransmitters** is often underestimated. As such, amino acids regulate almost all of the metabolic processes in the human body, and they are essential for a healthy body.

The benefit to using amino acid supplements over protein is that the amino acids are easier for the body to absorb. There are a large variety of amino acid supplements and amino acid processing techniques. In general, look for amino acid supplements prefaced by the letter L (such as L-arginine), which is what is used in Spray For Life®. Spray For Life® uses an Amino Acid Complex Premix supplied by Glanbia Nutritionals, a company that offers one of the best premixes in the world.

Q9: What is Garcinia Cambogia and why is it in the Sweet & Slim®?

A: *Garcinia Cambogia* is a small, pumpkin-shaped fruit, sometimes called tamarind. Though native to Indonesia, it is also grown in India, Southeast Asia, and West and Central Africa. It has long been used in traditional South Asian dishes, including curries and chutneys.

Adding this ingredient to meals is considered to be effective in making meals more “filling.” In some villages in Malaysia, garcinia is used to make a soup that is eaten before meals for weight loss because of garcinia’s appetite-blocking abilities.

This plant offers one of the least expensive herbal supplements on the market. The ingredient from the rind of the fruit could hasten your weight-loss efforts. The natural extract is called hydroxycitric acid (HCA), and researchers claim that HCA can double or triple one’s weight loss.

With proper weight-loss efforts (dieting and exercising), the average person taking HCA lost an [average of four pounds a month](#).

Garcinia may also be great for emotional eaters. Those who participated in the study showed an increase in their serotonin levels; hence, it may also improve mood and sleeping patterns.

How Does Garcinia Cambogia Work?

The HCA extract from garcinia cambogia supplement aids in weight loss by doing two things: It helps to block fat, and it suppresses your appetite.

HCA blocks fat by inhibiting a key enzyme that your body needs to make fat from carbohydrates: [Citrate lyase](#). Usually carbohydrates or sugars that are not used immediately or stored in other forms are converted into fats. When HCA inhibits citrate lyase, the fat-making process is halted and the production of LDL (bad cholesterol) and triglycerides decrease.

HCA also suppresses appetite by increasing serotonin levels. Serotonin is a neurotransmitter in your brain that makes you feel good. It’s a target of many antidepressant medications. Having low levels of serotonin may make you feel depressed or anxious; it drives many people into [emotional or reactive eating](#). By increasing serotonin levels, HCA improves mood and suppresses the drive to react to stressful situations with food. As you eat less, your body senses this and it releases stored fat in your fat cells.

Spray For Life’s [Sweet & Slim®](#) has been testing this amazing ingredient, garcinia cambogia (Super Citrimax) since 1997 with tremendous results. Spray For Life® has been purchasing and following the clinical results from [InterHealth](#) since that time. [InterHealth](#) is the company that supplied Dr. Oz with the clinical trial to validate his assessment of this wonder fruit. In the last 16 years, Spray For Life® has been able to reduce the dosing and add ingredients that work synergistically in the success of garcinia without compromising the results. This fast action spray works quickly to satisfy your hunger needs and as a result, is a great replacement snack as it tastes just like candy.

Q10: Do we really need Vitamin Supplements?

- What nutritionists have said all along is now official. It pays to take health supplements.
- [The American Medical Association \(AMA\) has reversed its previous anti- vitamin stand after 20 years](#), and now encourages adults to take vitamins daily. This was after a study of 38 years of scientific evidence by Harvard researchers Dr Robert Fletcher and Dr. Kathleen Fairfield.
- In reports published in the [June 19 2002 edition of JAMA](#) (Journal of the American Medical Association), they concluded that the modern American diet is enough to prevent deficiency diseases, but not enough to support optimal health.

"Insufficient vitamin intake is apparently a cause of chronic diseases. Recent evidence has shown that suboptimal levels of vitamins (below standard), **even well above** those causing deficiency syndromes, are risk factors for chronic diseases such as cardiovascular disease, cancer, and osteoporosis. A large proportion of the general population is apparently at increased risk for this reason."

-- Dr Robert Fletcher and Dr Kathleen Fairfield (emphasis mine)

The conclusion is supplementing with a daily multi-vitamin is important to health, and a wise preventive measure against disease.

Q11: Should We Take Vitamins Daily And How Nutritionally Deficient Are We?

In a massive random survey of residents of the United States (one of the wealthiest nations in the world with arguably the best supply and variety of food) it was found that:

- 25 - 50% get less than the RDA of vitamin A
- 25% get less than the RDA of vitamin C
- 80 - 90% get less than the RDA of vitamin E
- 25% get less than the RDA of folic acid
- 50% get less than the RDA of calcium

... and so on.

To compound this problem, not only are we eating nutrient-deficient diets, but it appears that the RDA (Recommended Daily Allowances) of many nutrients may actually be too low. Many research scientists now believe that RDA levels may have been set at what is necessary to avoid obvious signs of deficiency rather than what is needed for optimum health.

Q12: What are Vitamins?

Vitamins are organic compounds which are needed in small quantities to sustain life.

A vitamin is one of a group of organic substances, present in minute amounts in natural foodstuffs, that are essential to normal metabolism; insufficient amounts in the diet may cause deficiency diseases.

Put simply, a vitamin is both:

- An organic compound (contains carbon).
- An essential nutrient the body cannot produce enough of on its own, so it has to get it (tiny amounts) from food.

There are currently 13 recognized vitamins.

Fat soluble and water soluble vitamins

Fat-soluble vitamins are stored in the fat tissues of our bodies, as well as the liver. Fat-soluble vitamins are easier to store than water-soluble ones, and can stay in the body as reserves for days, some of them for months.¹

Fat-soluble vitamins are absorbed through the intestinal tract with the help of fats (lipids).

Water-soluble vitamins do not get stored in the body for long - they soon get expelled through urine.

Water-soluble vitamins need to be replaced more often than fat-soluble ones.

Order and Payment

Q1: How do I place an order?

A: To place an order using your shopping cart, follow these simple steps:

1. Add items to your cart by clicking the Add to Cart button displayed along with the product description.
2. When you have added all of the items you wish to purchase to your cart, click the Checkout button on either the shopping cart page or the top right corner of the page you are using.
3. Enter your billing, shipping and payment information as directed.
4. Confirm your order by clicking the SUBMIT ORDER button located at the bottom of the confirmation page.

Q2: A product I wish to buy is out of stock. Can I still order it?

A: For shipments in the continental United States: If an item is backordered, we will ship the balance of your order immediately and send your backordered item when it becomes available at no additional shipping charge.

For shipments elsewhere outside of the United States: If an item is backordered, we will give you the option of holding your shipment until it is complete or eliminating the backordered product from your order.

Q3: How can I find out the status of my order?

A: Ensure you have received a shipping confirmation email and locate tracking number.

Q4: Can customers outside the U.S. order from the website?

A: Yes. The order and payment methods for international orders are the same as for domestic orders.

Q5: Can I make changes to my order after I have submitted it?

A: We work hard to get your orders processed as quickly as possible. Due to the speed of most of our shipments, they are usually processed and shipped the same day so we are not able to make any changes once the order has been submitted.

Q6: Can I cancel my order once it has been submitted?

A: We work hard to get your orders processed as quickly as possible. Due to the speed of most of our shipments, they are usually processed and shipped the same day so we are not able to make any changes once the order has been submitted.

Q7: I order the same products each time. Can I be set up to receive them automatically?

A: We currently have an auto ship program that allows you to have your Spray For Life® products sent to you monthly with free shipping. For details on Auto Ship please click [HERE](#).

Q8: Will you notify me if there are problems with my order?

A: We will immediately notify you by email of any complications with your order, including backorders and credit card authorization issues.

Q9: What forms of payment do you accept?

A: We accept the following credit cards:

Visa
MasterCard
American Express
Discover

And also for your convenience, we accept PayPal

Q10: Do I need to pay sales tax with my order?

A: No. All Spray For Life® products are considered as food and are exempt.

Q11: If one or more of my items are on backorder, when will I receive my order?

A: If any items are on backorder, we may hold the order for a few days to wait for the backordered items if they will be back in stock soon. If we don't expect the backordered item back in stock within a few days, we will ship the rest of your order as scheduled.

Shipping

Q1: When will my order ship?

A: We make every effort to ship your order the same day if it is placed before 5p.m. Eastern Time and if all items are in stock. If any items are on backorder, we may hold the order for a few days to wait for the backordered items if they will be back in stock soon.

Q2: What shipping carrier do you use?

A: United States Postal Service

Q3: What are my shipping options? How much does each cost, and how long will it take?

A: All orders shipped within the United States, U.S. Territories (Puerto Rico, U.S. Virgin Islands, Guam, American Samoa, Palau, and the Northern Mariana Islands) P.O. Boxes, APO, FPO or DPO addresses are shipped for a flat shipping fee of \$4.95. When you place your order on the web, the shipping option will automatically default to the \$4.95 (standard) option. If your address qualifies for other shipping options, you will be able to select the option of your choice. Shipping options that you may qualify for include:

- First Class (2-5 business days) \$4.95
- Priority (1-3 business days) \$7.95
- Express (Next Day) \$19.95

Q4: Do you refrigerate products during shipping?

A: Products are kept under a temperature controlled environment in our warehouse facility, but are not kept refrigerated during the course of shipping. Please refer to [Q30: Is Spray For Life® affected by extreme temperatures](#), for additional information

Q5: How can I determine the exact shipping cost for international orders?

A: International Shipping cost can only be obtained at the checkout page. If you do not agree with the cost you may back out of your order.

Q6: Will you notify me when my order has been shipped?

A: You will first receive an email confirming your order, and then another email notifying you when your order has been shipped.

Q7: Can I ship to an address other than my own?

A: Yes. When you go through the order checkout process, you will be able to enter separate addresses for billing and shipping.

[Product Questions](#) | [Customer Service](#) | [Privacy Policy](#) | [Product Guarantee](#) | [General Info](#)

Return Policy

Q1: What is your Easy Return Policy?

A: Our Easy Return Policy: NanoSynergy Worldwide takes great pride in manufacturing a superior nutritional product for our customers and is backing it up with a 100% Satisfaction Guarantee. If for any reason you're unsatisfied with your purchase, you may return the product for a full refund.

Q2: How do I return an item?

A: To make a return, you must first request a Return Merchandise Authorization (RMA) number. Before you send your merchandise back to NanoSynergy, request your RMA number by emailing your request to returns@nanosynergyww.com.

Please write your RMA number on the outside of your package for returns via mail, you must carefully package the product, you are responsible for the cost of return shipping, and we must physically receive the return within the 30 day period. We recommend using UPS, FedEx or some other form of insured mail for returns, as we cannot be responsible for items that never make it back to our warehouse.

NanoSynergy® reserves the right, at its sole discretion, to reject any return that does not comply with these requirements.

Q3: What should I do if my items arrive damaged or defective?

A: We make every effort to package your order so that it will arrive in great condition. Unfortunately, sometimes items may be damaged during shipment. We understand your frustration and we will do everything we can to replace the product as quickly as possible. If you have received a damaged item, please e-mail us at customercare@nanosynergyww.com or call us at 1-877- NSW-NANO (679-6266). Give us your name, order number and the item number that was damaged and we will arrange for the damaged item to be replaced immediately.

Q4: What should I do if I received the wrong item?

A: If you received the wrong product, simply e-mail us at customercare@nanosynergyww.com or call us at 1-877- NSW-NANO (679-6266). Give us your name, order number and the item that was not correct and what item you should have received. We will check into this immediately, arrange for the missing product to be returned to us, and send out the correct product right away! You will receive the correct one before you know it.

Privacy Policy and Terms & Conditions

Welcome to [Spray For Life®](#), owned by NanoSynergy Worldwide, Inc. If you have any questions about our policies and procedures you may feel free to contact us at [Spray For Life Contact](#)– attention Privacy Department.

Spray For Life® has created the following privacy policy to fulfill our commitment to protecting your privacy, and to inform you of our information-gathering and dissemination practices. This online privacy policy will tell you about, among other things, the information Spray For Life® collects through our Web site, how we use that information, how you can opt out of certain uses of the information we collect, and how Spray For Life® can make changes to this privacy policy. Please let us know if you have any questions regarding this privacy policy by contacting us at info@sprayforlife.com.

But first a note about children's privacy...

We do not knowingly collect personal information from children under the age of 13. If we learn that we have inadvertently obtained personal information on a child under the age of 13, that information will be deleted from our systems. Spray For Life® encourages parents to go online with their kids. Here are a few tips to help make a child's online experience safer:

Teach kids never to give out personal information, unless supervised by a parent or responsible adult. This includes their name, address, phone, school, etc.

Know the sites your kids are visiting and which sites are appropriate.

Look for Web site privacy policies. Know how your child's information is being treated.

Q1: What information does Spray For Life® collect?

A: Our purpose in collecting your personal information is to provide you with a more customized experience. This information lets us provide services and features that we think are more likely to meet your needs. Of course, users can browse our Web site without providing any personal information, but once you give us this personal information, you are not anonymous to us.

Spray For Life® collects two types of information when you visit our Web site: information that may be used to identify you individually, such as your name and email address ("personal information"), and non-personal information, such as IP addresses, the type of browser you are using, and aggregated information about user activities on our Web site ("non-personal information").

Personal Information: We specifically request personal information from you at certain points on our Web site. For example, when you purchase product through our web site and enroll in any of our forums, we collect personal information to complete the transaction. This information may include, without limitation, your name, shipping and billing addresses, telephone number, email address, and credit card information. From time to time, we may also request personal information about you and your interests in surveys, contest entry forms, or in other ways. You may always choose not to provide us with your personal information; however, this may limit our ability to provide you with a specific product or service, or to offer you personalized content.

Non-Personal Information: When you visit our Web site, we also collect non-personal information, such as your IP address, which is a number that can be used to identify your location and Internet Service Provider. We may also collect the URL from which you came to our Web site and the URLs visited on our Web site. A URL is the full address of a Web site page, which may contain some personal or identifying information about the person who is viewing it.

NanoSynergy®, NanoMist®, and Spray For Life® are registered trademarks.

Use of Cookies: We also use a feature of your browser called a cookie to assign identification to your computer. The unique user ID contained within your cookie automatically identifies your computer—but not you—to our servers every time you visit our Web site. Cookies by themselves cannot be used to find out the identity of any user, but may be correlated with identity information in our log files. You can turn off the cookie feature by using your browser preference options, but you may not be able to utilize some services properly. Current versions of many Web browsers offer enhanced user controls for the placement and duration of cookies. Search for "cookies" under your Web browser's Help menu for more information on the cookie management features available to you.

Use of Pixel Tags: We may also collect information through the use of "pixel tags" included in email messages we may send to you. Pixel tags are tiny graphic files, not visible to the human eye, that are included in HTML-encoded email messages. When such a message is opened in an HTML-capable email program, the recipient's computer will access our server to retrieve the pixel tag file, allowing us to record and store, along with the recipient's email address, the date and time the recipient viewed the email message, the fact that the recipient's email program is capable of receiving HTML-encoded email, and other standard logging information. The pixel tag also may see or read cookies.

Q2: How does Spray For Life® use or disclose the information it collects?

A: Spray For Life's Use of Personal Information and Non-Personal Information: We use your personal information to process your requests, to improve the features of our Web site, and to communicate with you. We may also use your personal information to personalize our Web site, to target advertising or promotions that may be of interest to you, and to analyze aggregate user data in order to improve our services. On occasion, we may also contact you about Spray For Life® products or services that we think you will find useful. We might also contact you to see if you are interested in participating in market research regarding Spray For Life®. For information about opting out of such communications, please see our [Opt-Out Policy](#) section below.

Co-Branded Offers: In arranging to have marketing and promotional information of certain companies or businesses with whom Spray For Life® may have formed a strategic alliance ("Affiliated Companies"), we may disclose to the Affiliated Companies your personal information, including information such as your shipping address, billing information, telephone number, and credit card information. If you do not want us to disclose your personal information to the Affiliated Companies, please refer to the [Opt-Out Policy](#) below.

Third-Party Offers: In arranging to have marketing and promotional information of third-party companies that we think might be of interest to you, we may disclose your personal information, including information such as your shipping address, billing information, telephone number, and credit card information to nonaffiliated third parties not controlled by Spray For Life®. If you do not want to us to disclose your personal information to third-party companies, please refer to the [Opt-Out Policy](#) below.

Cookies (again): We may use cookie and IP address information to count and track Web site visits in the aggregate, to personalize the Web site for each unique user, to control the frequency of individual advertisements to individual computers, and to target advertisements and promotions to broad demographic segments. We may also use IP addresses to help diagnose problems with our server, and to administer our Web site.

Customer Service Issues and Contacts: We may use your email address to contact you in response to customer service complaints you have submitted, to address a problem affecting your use of the service, or to verify information concerning a transaction.

Transaction Processing: When you make a purchase on our Web site, we may need to provide personal information, including information such as your shipping address, billing information, telephone number, and credit card information, to third parties, including product manufacturers and shipping companies, as necessary solely to complete the transaction.

Legal Requirements: We may disclose personal information when we deem necessary or appropriate to law enforcement or other entities or third parties as required by law or to protect our rights or the rights of others, to prevent harm to persons or property, to fight fraud, identity theft, or otherwise to comply with the law or legal process, to respond to claims, to protect our systems and customers, to ensure the integrity and operation of our business and systems, or to protect the rights, property, or safety of Spray For Life® and its employees or others.

Business and Accounting Disclosures: We may also disclose non-identifying transaction information to third parties for the purpose of accounting and record keeping. We may also disclose aggregate user data or non-personal information in order to describe our services to prospective business partners, advertisers, and others, but will do so only in a form that does not identify individual users.

Opt-Out Policy

You may opt out of receiving communication from us, from Affiliated Companies, or from other third parties by emailing us at: info@sprayforlife.com or [Spray For Life Contact](#).

Also, when we contact you via email, we may include instructions to unsubscribe from future emails if you so choose.

Security

This Web site has industry-standard security measures in place to protect the loss, misuse, and alteration of the information under our control, and we make good-faith efforts to store your personal information in a secure operating environment. Unfortunately, no data transmission over the Internet can be guaranteed to be absolutely secure. As a result, while we strive to protect your personal information, we cannot ensure or warrant the security of any information you transmit to us or our online products or services, and you do so at your own risk.

Other Websites; Links

We may include links to Web sites operated by our business partners, affiliates, advertisers, and others. These third parties have separate data collection and privacy practices independent from ours, and thus Spray For Life® cannot be responsible for their policies or activities. Please contact those third parties directly if you have questions about their privacy policies.

Community Center/Community Chat rooms/Message Boards

If our Web site includes online forums, chat rooms, message boards, and other interactive technologies that allow comments, messages, emails, and postings to be associated with a user's name or email address. Any information you post is public information and Spray For Life® cannot control what use third parties may make of this personal information.

All of these forums are public. Please consider this before you post.

Q3: How can I correct, update, or delete my information?

A: Spray For Life® does not currently have a method for users to delete the personal information contained in our database. However, you may change or update the personal information we have

collected by sending an email to info@sprayforlife.com. Please include your email address, your order number, the name of the product you purchased, and the information you wish to change. In addition, you may delete the cookie stored on your computer, which will cause our system to perceive you as a new user with no known user data. You may also set your browser to reject cookies, but doing so may prevent you from using some of our services.

International Users

Like almost every Web site, Spray For Life® may be accessed by an international audience. By visiting our Web site and providing us with data, you acknowledge and agree that your personal information may be processed for the purposes identified in this policy. In addition, such data may be stored on servers located outside your resident jurisdiction and in jurisdictions which may have less stringent privacy practices than your own. By providing us with your data, you consent to the transfer of such data.

Q4: What happens to my information if Spray For Life® is sold to or merges with another company?

A: It is possible that Spray For Life® and/or any of our assets may be acquired by an unrelated third party. In such a transaction, as the owner of this customer information, we may disclose or sell the information as an asset of the company in conjunction with the sale of our company or the sale of a portion of our assets to a third party. While we will endeavor to require the successor company to maintain this privacy policy, we cannot guarantee that our policy will remain in effect.

Changes to This Policy

This policy may change from time to time. If we make any substantive changes to the policy in the future with regard to how we use your information, we will post those changes on our Web site in this location together with the date of the last update. Your continued use of the Web site after the changes are posted constitutes your agreement to the changes, both with regard to information we have previously collected from you and with regard to information we collect from you in the future. If you do not agree to the changes, please discontinue your use of our Web site.

Last changed: 08/02/2018

GENERAL INFO

General Information About NanoSynergy Worldwide, Inc.

[NanoSynergy Worldwide, Inc](#) (NSWW) is a privately owned Corporation formed in Nevada in 2003 as a Research & Development Company in the field of Nanotechnology. NSWW is the exclusive Master Licensee for U.S. Patent #6,861,066, a system patent that was issued on March 1, 2005, for a "Method

Sprayforlife.com

NanoSynergy®, NanoMist®, and Spray For Life® are registered trademarks.

for Delivery of a Biologically Active Agent". The patent describes a unique delivery process, designed to maximize the product effectiveness of a wide variety of liquids through an oral spray for humans and animals. In addition, NanoSynergy® has exclusive rights to the international patent pending utilizing this proprietary process for the treatment of Pernicious Anemia employing its Vitamin B-12 Nano-composition.

The Company's core focus is to implement this patented NanoSized™ process to improve the delivery of nutraceuticals, pharmaceuticals, cosmeceutical, and agricultural products. This Nanotechnology is far reaching and the following list describes some of the benefits:

- 1) faster onset of action
- 2) increased absorption
- 3) increased bioavailability
- 4) increased cellular penetration, activity & function
- 5) therapeutic efficacy
- 6) no swallowing difficulties
- 7) lower dosing needed for effectiveness
- 8) bypassing the full digestion process & eliminating stomach upset
- 9) eliminate the first pass taxation to liver and kidneys
- 10) taken anywhere without water

NSWW works closely with prominent scientists and researchers to develop new innovations in product formulations and to collaborate with existing nutraceutical and pharmaceutical companies to assist them in working to better enhance or improve their products. This is accomplished by reducing the dosage needed, thus reducing or eliminating many of the side effects associated with supplements or medications. NSWW is dedicated to developing "clinically tested" nano-science based products that serve the primary needs of the consumer while delivering them a better quality of life.

For more information about NSWW, please feel free to contact us at: Toll Free 1-877-NSW-NANO, email info@nanosynergyww.com or [Spray For Life Contact](#).
